FOR IMMEDIATE RELEASE

MATERIALS RECOVER FACILITY AND NEW SECURITY CAPABILITY

Abingdon, VA – MXI Environmental Services (MXI), a waste transportation and environmental services company, is pleased to announce that their Materials Recovery Facility (MRF) at 26319 Old Trail Road (State Road 879), Abingdon, VA has added a new state of the art security camera system. This system assures 24/7 coverage of the 24,000-sq. ft. Materials Recovery Facility and the access to it. This system is also accessible on line through the MXI web site www.mxiinc.com and will allow customers to view the handling of their materials being processed at the facility.

“Expanding the security at the facility to include on line access by our accounts represents another step by MXI to providing truly state of the art capability to our customers. They can realize the benefits of witness programs without leaving their desk,” says Ron Potter, MXI’s president. “Our customers have asked for and appreciate this convenience.” MXI transports waste, including less than truckload quantities, from customer facilities on MXI-owned trucks and brings it to the Abingdon facility for recycling, resource recovery and disposal.

The facility can process a variety of wastes, including

- Consumer package goods
- Drug products
- Ethanol bearing products
- Household hazardous waste
- Universal waste including fertilizers & pesticides
- Contaminated materials including soils, sands and still bottoms
- Water treatment chemicals

“We take title to the waste once we receive it and the customer’s obligation stops,” says Scot Shaw, the MRF manager. “Many other firms can’t offer this. We work with generators to profile the waste and then we prepare all the documentation and provide certificates of disposal. Now we allow our customers to view their material through out the process”

Treatment and disposal methods vary, depending on the type of waste. The MXI facility also has state-of-the-art containment to prevent release of materials into the environment.

MXI has been in business since 1960 when founder C.G. Potter started a small trucking operation out of the Erie Railroad ramp in Jersey City, NJ. He named the company Maumee Express after his hometown of Maumee, OH. Today the company has two divisions, Maumee Express, which handles hazardous and non-hazardous waste trucking, and MXI Environmental Services, which offers waste recycling, remediation and disposal services. MXI has continued to expand both operations. The MXI website www.mxinc.com has more information about MXI including a complete list of services offered, permit status and insurance certificates.
