FOR IMMEDIATE RELEASE

NEW TERMINAL FACILITY AT MAUMEE EXPRESS, INC.

Piscataway, NJ – On April 15, 2005 Maumee Express, Inc. and MXI Environmental Services LLC, collectively known as MXI, announced that it had purchased a terminal located at 297 Zimmerman Lane Bristol PA at the intersection of Rte 413 and New Falls road. The facility will consist of three sections: a 1,500 square foot administrative office, a 4,000-sq. ft. maintenance garage and a 3,000 sq. ft. 20 door cross dock facility. The total site covers 4 ½ acres and will support expansion of MXI's operations currently conducted at 50 Howard Street Piscataway, NJ. This facility represents a significant investment and will employ approximately 20 people when fully operational.

Mr. Ron Potter stated, "This new terminal establishes MXI's ongoing presence in our home market. We have leased several facilities in New Jersey for a number of years. Given our commitment to this industry, we determined that it was essential to own our terminal. The Bristol site is well located for our operation in NJ, PA and NY".

MXI has provided transportation services of hazardous and solid waste for over fifteen years. Its operations have expanded significantly over time and currently include transportation, recycling and disposal at various locations. In addition, MXI offers a wide range of remediation services. The Bristol facility will be the Dispatch and Maintenance Hub for the trucking operation in the Northeast and is the primary administrative office for Maumee Express Inc. MXI also has offices in Virginia, South Carolina, Texas and California.
